### SUMMARY

Python Full Stack Developer with hands-on experience in building responsive web applications using HTML, CSS, JavaScript, Bootstrap, jQuery, and React. Proficient in backend development with Django and MySQL for dynamic content and data management. Experienced in REST API integration, form validation, role-based access control, and secure authentication including email verification and session handling. Familiar with Git for version control and collaborative development.

### EXPERIENCE

#### Python Full Stack Developer

June 2024 - February 2025

CamerinFolks Pvt Ltd, Kochi – Training & Development in Full Stack Development

- Developed a task management system using Python, Django, PostgreSQL, and React.js, supporting multiple user roles: Admin, Project Manager, Team Leader, and Employee.
- Implemented task workflows including task assignment, time extension requests, performance tracking, and team coordination.
- Built mobile-friendly user interfaces using HTML, CSS, Bootstrap, and Django templates, with integrated form validation.
- Added secure user authentication with login/logout, session handling, and access control based on user roles.

### SKILLS

- **Frontend** : HTML, CSS, JavaScript, Bootstrap, Tailwind CSS, React
- **Backend** : Python, Django, REST API
- **Database** : SQL, PostgreSQL
- **Version Control** : Git, GitHub
- **Containerization** : Docker

### PROJECTS

#### Task Assigner

**Tech stack** : Python, Django, PostgreSQL, HTML, CSS, Bootstrap

- Built a full-stack task management system supporting role-specific dashboards for Admins, Project Managers, Team Leaders, and Employees.
- Implemented core features including task assignment, team coordination, progress tracking, and real-time status updates.
- Designed responsive interfaces with Django templates, integrating form validation, session-based access control, and secure authentication.

#### Librarify – Library Management System

**Tech stack** : Python, Django, Tailwind CSS, HTML, SQLite

- Implemented core features including task assignment, team coordination, progress tracking, and real-time status updates.
- Designed responsive interfaces with Django templates, integrating form validation, session-based access control, and secure authentication.

### EDUCATION

**Bachelor of Computer Application(BCA)**, MG University

July 2021 – May 2024

**SOFT SKILLS** : Communication, Team Collaboration, Problem-Solving, Adaptability, Quick Learner
